

Nama Family Hygiene Improvement Project

Project Code: FINIDP/HYGIENE-2007

The project aims at lifting the home hygiene and sanitation standards among selected families in Nama village by training them in home hygiene management such that they can act as change agents to others and reduce on disease prevalence. The project activities will be geared towards increasing family perception of the risk associated with poor hygiene; training families in good but cheap methods of home hygiene management; donating some materials to help families in home hygiene management and forming a task force that will train other homes in good hygiene management. The project beneficiaries will be mothers who will be fully sensitized and trained in cheap but efficient hygiene management skills such they continue training others at the end of the project. Mothers have been targeted since they are the pillars of home management and have a multiplier effect of easily influencing their children and husbands. The cost of the project is \$500 per subcounty.
